

GESTAMP TECHNOLOGY INSTITUTE

Un cambio radical para la industria del automóvil

GTI is committed to the development of all Gestamp employees' professional skills through the design and delivery of innovative learning programs regarding our global business' technologies, processes, systems and rich portfolio of products.

This Centre of Excellence, located in Boroa (Vizcaya) fosters technical learning within the automotive sector to satisfy Gestamp professionals' continuous development; always from an innovative point of view, both from a theoretical and practical way.

GTI supports "learning by doing" programs, as well as online degree programs and certificate options in industrial high tech subjects. In collaboration with Campus Units, Gestamp Experts, Educational institutions and other partners, we spark new ideas, strategies, and knowledge to shape the future of teaching and learning within the automotive industry.

Technology and constant innovation are essential to education and professional development at Gestamp Technology Institute.

Project Team:

Corporate IT/IS Team – Gestamp Corporate University

PLM Specialist

Goal

Generate an international sustainable pool of professionals at Gestamp skilled to drive IT and business collaboration in the PLM (Product Lifecycle Management) area, delivering best-in class PLM solutions based on business needs alignment to GPCS methodology and provide "in- suite" support and technical guidance in the development of requirements, deployment, learning, adoption and process improvement.

Content

The PLM Specialist Training Program is a training program in GTI with an internship period within Gestamp Corporate Office or Analisis and Simulation Office. After successfully completing the program, students will be to star their profesional career.

The PLM Specialist Program will include:

1. Common learning activities, regarding PLM's global functionalities
2. Specific Gestamp's PLM's functionalities, common to all students
3. Specific Gestamp's PLM's functionalities, specific to the different roles of PLM
4. A 6 month's internship period

This Gestamp learning program is aimed at University or Vocational Qualification Graduates in Computer Engineering and or Industrial Engineering in Electronics seeking to develop a career at Gestamp within the GPCS PLM area. No previous experience required but design skills are welcome.

Students will be selected after a specific recruitment process by the petitionary departments at Gestamp.
